JCP.next Working Group update

January 2011

Membership

- Stefano Andreani
- Michael Bechauf
- Edin Bektesevic
- Patrick Curran
- Mike DeNicola
- Don Deutsch
- Eduardo Gutentag
- Scott Jameson
- Mark Little
- Roger Mahler
- John Rizzo
- Heather VanCura
- James Warden
- Steve Wolfe

Meeting logistics

- The entire EC is the Expert Group, and must approve all decisions.
- The WG will meet approximately weekly by phone, f2f in conjunction with EC f2f meetings, and at additional f2f meetings as necessary (we are planning one for March.)
- Any EC member is free to attend the WG but we need a core of committed members in order to make progress.
 - At least some WG members must do “homework” between meetings.
- The WG will draft the Process Document and JSPA changes for EC approval.
- We need legal advice for at least some of our changes.
 - This is complicated (whose lawyers?)

Transparency

- Despite recent issues with jcp.org,
 - We will publish our meeting minutes and all documents we produce for the world to read.
 - A publicly-writeable alias will enable jcp.org members to comment on our work.
 - We will track comments and issues in a publicly-readable issue-tracker.

JSR logistics

- Withdraw JSR 306 (in progress.)
 - Reuse interesting material from that effort.
- File two new JSRs:
 - JCP.next will focus on *low-hanging-fruit* (work that can be accomplished within about 6 months.)
 - This precludes JSPA changes, hence only this JSR will change only the Process Document.
 - Target for completion: mid 2011.
 - JCP.next++ will tackle more complex issues, including JSPA changes.
 - Target for completion: early 2012.

The shopping list

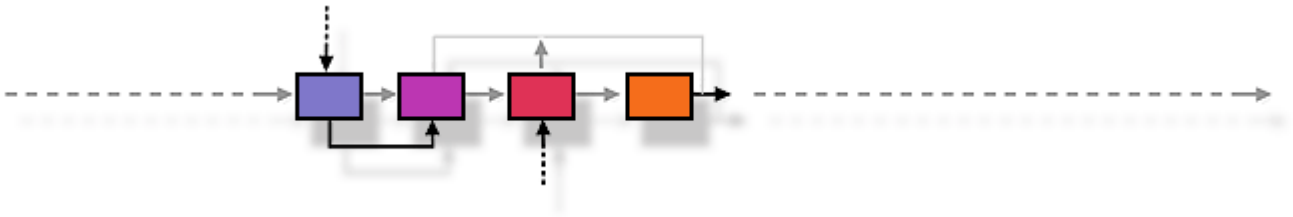

- JCP.next presentation proposals.
- JSR 306 proposals.
- Wayne Carr's summary of earlier proposals.
- Additional items suggested by members of the WG (see December 16 minutes.)

(All of these materials have been circulated to the EC. We will review them and draw up a definitive list during this afternoon's session.)
