

ECperf 1.0 Specification Errata

March 15, 2002

1. Clause 4.5.5

Modify Clause 4.5.5 as follows :

Optimizations used to avoid ejbStore operations on entity beans are allowed only if the deployer does not need knowledge of the internal implementation of the ECperf Reference Beans. If such optimizations are not transparent to the deployer, they should be disclosed.

2. Clause 5.1.4

Add new Clause 5.1.4 as follows :

Any software that is required to build and deploy the ECperf Reference Beans is considered part of the SUT.

3. Clause 6.3.3

Modify Clause 6.3.3 as follows :

All pricing used must be generally available (list) pricing. No form of discounts or promotional pricing is allowed.

4. Clause 7.4.9

Add following to Clause 7.4.9 :

Any vendor-specific tools, flags or properties used to perform ejbStore optimizations that are not transparent to the user must be disclosed (see Clause 4.5.5)

5. Clause 7.4.11

Add the following to Clause 7.4.11 :

All steps used to build and deploy the ECperf Reference Beans must be disclosed.
